Eventdome – The power of nature
We produced and built the temple of gifts as an event dome for Switzerland's largest sports folk festival, the Eidgenössisches Schwing- und Älplerfest Pratteln in Baselbiet. The engineering highlight made of Swiss spruce wood with a diameter of 46 m, a height of 14 m, a roof area of 2300 m2 and a total area of 1800 m2 is conceptually versatile and sets the stage for every event and product presentation.
As an exceptional event location, the dome is not only an aesthetic spatial solution, but also meets the highest ecological standards. The CO2-neutral dome also enables uncomplicated assembly and dismantling with its prefabricated elements and logistical pre-planning.
