Häring AG Sisslerstrasse 15 CH-5074 Eiken t +41 (0)61 826 86 86 **HARING.CH**

This school building in Port was constructed by adding a timber shell to concrete panels. Häring AG was awarded the complete contract. The entire floor plan proved extremely challenging, as all walls and ceilings are arranged at unusual angles. The interior ceilings are fitted with acoustic panels. The façade is made of pressure-impregnated silver fir.
