

## Zeglistrasse, Hirschthal

These two four-storey hybrid buildings in the heart of Hirschthal in the canton of Aargau each contain 14 apartments. The elements of the curtain façade and the entire loft storey were constructed using our modular timber construction method, with solid stairwells and intermediate floors. The wooden and metal windows were already installed in the prefabricated elements at our factory in Eiken.

### Services:

- Prefabricated timber construction

### Client

Skyline Development GmbH  
Obere Bühelstrasse 29  
8700 Küsnacht
