

## Extra storey, Schwamendingenstrasse in Zurich

### Services:

- Prefabricated timber construction
- Interior fitting

Häring Attico was called upon to add an extra storey to an apartment building on Schwamendingenstrasse in Zurich, creating two new one-bedroom loft apartments measuring 54 m<sup>2</sup> and 57 m<sup>2</sup>. Large open-air terraces were added on both sides of the apartments for the residents to enjoy spending time outdoors in the summer. At the same time as the main work, the owner took the opportunity to repaint the façade and thus blend the extension seamlessly into the existing building. Häring AG performed all the work as the complete contractor.
