

Kindergarten, Rheinfelden

Services:

- Holzelementbau
- Fassadenverkleidung

Speciality:

- Fassade

This single-storey, double kindergarten is built on top of a garage on Im Hard and Im Holder on the Augarten housing estate in Rheinfelden. The prefabricated exterior and interior walls were constructed using timber framework. The roof is made from laminate and solid wooden elements. Two equipment stores were built next to the kindergartens. Häring AG was responsible for the modular timber construction.
