## New administration building for Zweifel Pomy-Chips in Spreitenbach

We were involved in the planning, production and assembly of the wood façade on the new production and administration building of the renowned snack manufacturer Zweifel, based in Spreitenbach. The building phase lasted from September 2018 to February 2019. The rear-ventilated vertical wooden façade consists of pre-greyed spruce, ensuring a consistent look. While the base of the building was covered with wooden formwork, the façade of the section of the building above that consists mainly of glass, creating a clear division in the appearance of the building.
