

Detached house, Füllinsdorf

Bold shapes and natural materials characterise this eye-catching, cutting-edge, three-storey detached house. Its façade consists of open rhomboidal, pre-greyed spruce formwork. The roof, which is supported on exposed beams, overhangs on all sides to protect the wooden shell. The building is fitted with triple-glazed windows. Its exterior walls, ceilings, interior walls and roof are made from insulated timber frame elements. The interior walls and ceilings are clad with gypsum fibreboards.
