

New building Heilpädagogisches Zentrum Innerschwyz Ibach

Services:

- Prefabricated timber construction
- Façade cladding
- Interior fitting

Speciality:

- Façade

Assembly construction in wood: factory planning, production and assembly of the prefabricated wood construction elements

For the Heilpädagogische Zentrum in Ibach, Canton Schwyz, we carried out the factory planning, production and assembly of the new 5-storey building in timber with a total net floor area of 4400 m² and outdoor facilities of 1400 m². All elements for this were produced in the factory in Eiken and transported to Ibach by articulated lorries. The optimised façade was designed to increase user comfort while reducing energy and technical costs.
